React • MVC • Android • MySQL •

NextJS • UI/UX Designing

EXPERIENCE

AVRL | PRODUCT OWNER / PRODUCT ENGINEER

March 2024 - Present | Remote

- Led the development of the callAG API at AVRL, streamlining automation for third-party logistics in the U.S. spot freight market by replacing web scraping. Achieved an 80% reduction in bot processing times, significantly increasing the volume of freight opportunities secured for clients.
- Currently leading the development of the Phoenix system at AVRL using Flask, the core platform powering all automation processes for generating base rates used in spot freight bidding. Standardized processes to maximize customer flexibility in fine-tuning rates, enhancing control over pricing strategies and driving increased profitability.

AVRL | SOFTWARE DEVELOPER ENGINEER

June 2022 - March 2024 | Remote

- Leveraging my proficiency in JavaScript, I contribute my skills to AVRL, enhancing their ability to provide clients with cutting-edge web automations
- Demonstrating expertise in web automation, I am entrusted with the responsibility of managing and optimizing over 4 automation templates. My role involves frequent updates to enhance their modularity and minimize errors, ensuring minimal downtime for automations. I prioritize proactive error logging for swift and accurate issue resolution, contributing to the seamless functioning of automated processes.
- Designed and developed 10+ automation templates for clients, optimizing operational efficiency. Reduced automation run times by up to 30%, enabling faster and more reliable process execution.
- Consistently maintained the lowest ticket turnaround times while ensuring continuous monitoring of automation bots. Improved customer satisfaction and reduced automation downtime by up to 40%, leading to enhanced ROI for clients.

VISTAAR DIGITAL | ASSOCIATE SOFTWARE ENGINEER

Jan 2022 - May 2022 | Mumbai+Remote

- Help in the process to create custom Wordpress widgets
- Interacted directly with client's to understand their needs and provide them with the viable front end solutions for their website
- Optimize sites for faster load times

ILLUSTECH | INTERN WEB DEVELOPER & UI/UX DESIGNER

June 2021 - Jan 2022 | Remote

- Illustech's own website was completely designed by me in Figma for both mobile and desktop.
- Helped create and manage multiple wordpress websites.
- Designed Credai Nagpur Metro Website in Figma. Also implemented the frontend for the website using Vanilla HTML, CSS and JavaScript for faster and leaner load times. Has a Google PageSpeed score of 95+.
